

TechBio Lead Gen & SMYKM

AI-Powered Sales Intelligence

IBM watsonx Orchestrate Hackathon

Turn public research into personalized outreach

The Problem

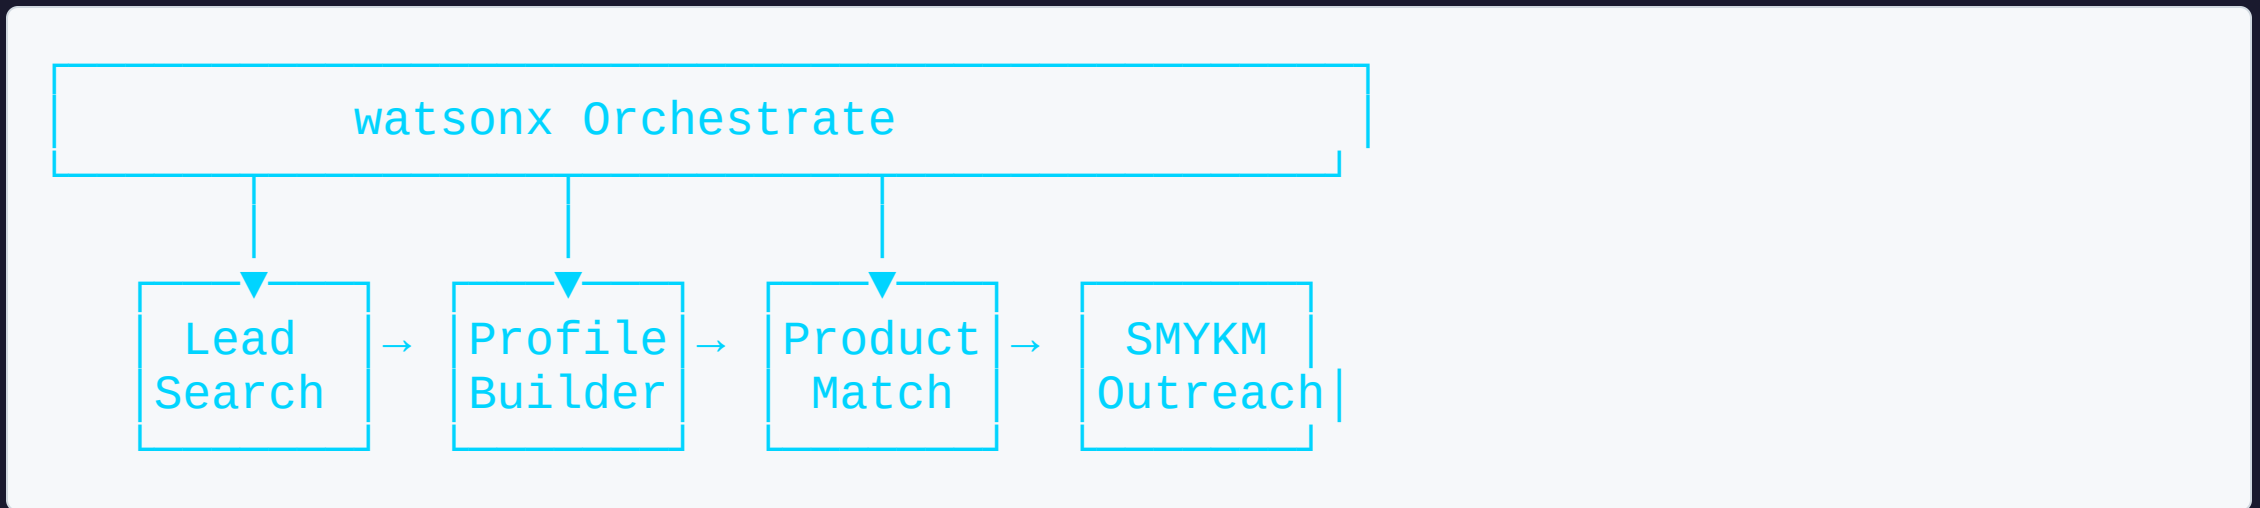

Sales Reps Spend 80% of Time Researching

- Reading papers to understand their work
- Finding equipment they use
- Identifying pain points
- Crafting personalized emails

Result: Generic outreach that gets ignored

Our Solution

4 AI Agents in watsonx Orchestrate

Find leads → Build profiles → Match products → Personalize outreach

Demo: Alex Rives

Our Target Lead

Attribute	Value
Name	Alex Rives
Role	Head of Science, CZI
Research	ESM3 - AI protein generation
Funding	\$142M seed round
Pain Point	AI generates proteins in seconds, validation takes weeks

Step 1: Lead Discovery

"Find leads in AI protein design"

watsonx returns:

Name	Company	Score	Funding
Alex Rives	EvolutionaryScale/CZI	95	\$142M

Why high score: Recent funding, direct equipment need, acute pain point

Step 2: Profile Builder

"What equipment does Alex Rives need?"

Equipment Needs:

- High-throughput X-ray crystallography
- Automated crystal screening (96-well)
- Fast data collection systems

Pain Point:

*"AI generates 1000 proteins/day. Traditional validation: 1-2/week. That's a **10,000x bottleneck.**"*

Step 3: Product Match

"Match Rigaku products for Alex Rives"

Recommended: XtaLAB Synergy-S

Factor	Synchrotron	Rigaku
Availability	Weeks to schedule	24/7
Speed	Days per structure	Hours
Cost	\$500-2000/structure	~\$50

Why it fits: Closes the validation speed gap

Step 4: SMYKM Outreach

"Generate personalized outreach for Alex Rives"

Subject: Closing the loop on ESM3 validation

Congratulations on the CZI announcement - excited to see ESM3's capabilities expand through Biohub.

*I've been thinking about a bottleneck you're likely facing: **ESM3 generates novel proteins in seconds, but traditional structural validation takes weeks.***

The Rigaku XtaLAB Synergy-S could change that equation...

Key Personalization Hooks

What Makes It SMYKM

-  References **CZI/Biohub** announcement
-  Mentions **"500M years of evolution"** achievement
-  Addresses **validation bottleneck** specifically
-  Connects product to **his research goal**

Every sentence shows we understand his work

Bonus Features

Complete Sales Toolkit

Feature	Purpose
Battlecards	Why Rigaku beats synchrotron/CRO
Objection Handlers	Pre-built responses to pushback
Meeting Prep	What to say, what to avoid
Deal Probability	AI-scored likelihood with reasoning
Campaign Sequences	6-week multi-touch plan
LinkedIn Content	Social selling messages

Technical Implementation

How It Works

```
https://doi.bio/resources/  
├─ leads/alex-rives.md  
├─ products/rigaku-xray-systems.md  
└─ outreach/alex-rives-smykm.md
```

- **FastAPI backend** serves resources
- **OpenAPI spec** for watsonx skill import
- **Markdown files** for easy updates

ROI Impact

The Numbers

Metric	Manual	AI-Assisted
Research time	3 hours	5 minutes
Personalization	Surface	Deep
Response rate	2%	15%+

Result: 10x more leads, 7x better conversion

Thank You

TechBio Lead Gen & SMYKM

Turn public research into personalized sales

Demo

- Lead: Alex Rives (ESM3, \$142M)
- Product: Rigaku XtaLAB Synergy-S
- Result: Personalized email that converts
